

RECOMMENDATIONS FOR CITRIX ALLPLAN BCM 2014

ADDITIONAL SOFTWARE RECOMMENDATIONS

General:

- To export reports to Excel or Word (price comparison lists, files and so on) and to use the spell checker, you need to install Microsoft Office 2010 on the same workstation.
- Exchanging deadlines and progress data between Allplan BCM and MS Project requires Office 2010.
- Exchanging deadlines and progress data between Allplan BCM 2008 and Asta PowerProject requires version 11.
- We recommend McAfee virus scanner

Connection to external text providers:

The interfaces to the various text providers are constantly being refined. Therefore, the following information should not be understood as minimum requirements. Rather, earlier versions of text providers are usually compatible, too.

- DBD-dyn. cost elements/STLB-Bau
- Schiller: version 04-2014
- Beuth: version 04-2014
- Heinze: version DVD 2014/2015
- SirAdos: version of July 2014
- BKI: version 16.0

RECOMMENDATIONS FOR CITRIX (MICRO- SOFT REMOTE DESKTOP SERVICE)

Minimum server setup:

- Intel Core i7 processor or compatible
- 8 GB RAM
- Hard disks 10000 RPM
- MS 2008 Server R2, 64 Bit

Recommended server setup:

- 2 x Intel Xeon processor at least 3 GHz (Sandy Bridge Generation) or Xeon E5620 Quadcore at least 2.4 GHz
- 16 GB RAM
- Hard disks 15000 RPM
- MS 2008 Server R2, 64 Bit

Software requirements:

- Citrix XenApp 6.5 / Windows Server 2008 R2 x64

Notes:

- Allplan BCM's performance under Citrix depends, among other things, on the network performance and can be somewhat slower compared to local Allplan BCM installations.
- The "application streaming" mode provided by Citrix is not supported.
- In the case of a network installation (without Citrix), please note that the file server should not be used as an Allplan BCM workstation. Otherwise, the system requirements apply to the client and the recommendations apply to the server.
- We do not recommend the use of a NetApp Server.

FURTHER INFORMATION

- Hardware recommended for Citrix servers varies depending on the Windows Server Edition you are using. You can find recommendations for these editions on the Microsoft website: microsoft.com
- Detailed information on configuring, optimizing and running Citrix can be found on the Citrix Website: support.citrix.com
